Client Relationship

Clients have an assigned relationship partner who assures quality reporting, timely information flow and speaks the same language.

Investors seeking to improve the performance characteristics of their portfolios require:

- Additional return sources not accessible via traditional long-only investments: alpha and alternative beta
- Portfolio diversification and/or protection
- Efficient access to actively managed, uncorrelated investment strategies
- Fixed income substitutes in an environment of low interest rates or as a hedge against rising rates
- Long-only equity replacements in a world of high equity valuations

Most of these requirements can best be addressed through portfolios of liquid alternative investment strategies implemented as multi-manager solutions.

-
- Solutions to particular investors' needs can be implemented through a single investment or a portfolio of investments, referred to as a multi-manager solution

 - Alternative multi-manager solutions have the benefit of being able to access a wide range of investment strategies, ranging from alternative beta to highly skill-based and actively managed strategies. They also provide specific or diversified exposures to asset classes across various time frames

 - The main advantages of alternative multi-manager solutions include:
 - Wider investment strategy universe
 - Portfolio management flexibility
 - Higher degrees of diversification
 - Lower volatility
 - Mitigation of manager-specific risk
 - Implementation through Offshore or UCITS structures

The wide range of advantages offered by alternative multi-manager solutions are an opportunity for investors to improve the risk/return profile of their existing portfolios.

Our philosophy

➔ Crossbow Partners is using a disciplined, well structured process for research, portfolio construction and monitoring:

Crossbow has a preference for smaller, specialist managers. A significant part of our approved funds have AuM <USD 500 mn and there is little overlap with most of our competitors. Independent risk management is focusing on market risk, operational risk and liquidity risk.

➔ Some examples of alternative multi-manager solutions and their main benefits in an overall portfolio context:

Crossbow Alpha	<ul style="list-style-type: none">- Objective is to deliver USD SOFR + 4% with very low volatility of 2% - 3%- Immune to rising interest rates, limited impact from equity market turmoil- Invests predominantly in arbitrage, relative value and other market-neutral strategies
Crossbow Trading	<ul style="list-style-type: none">- Objective is to deliver USD SOFR + 4 - 6% with low or negative correlation to bonds and equities- Attractive diversifier within traditional portfolios- Implemented through flexible, actively traded and mainly directional strategies
CB Global Commodity Portfolio	<ul style="list-style-type: none">- Objective is to deliver USD SOFR + 8 - 10%, uncorrelated with equities and bonds- Capitalizes on the multi-dimensional opportunity set available in commodity markets- Invests in hedge funds specialized in commodity strategies
CB Energy Transition Portfolio	<ul style="list-style-type: none">- Objective is to outperform the MSCI World TR & Energy Sector Index with lower volatility- Diversified stream of alpha and beta returns- Invests in L/S equity managers focused on the global energy transition
Your Solution	<ul style="list-style-type: none">- Bespoke solutions designed to meet your specific requirements- This could include exposure to credit/lending, digital assets, CTAs/Trendfollowing, volatility, regional investments (e.g. China) or megatrends

The Alpha Portfolio is suitable for investors seeking diversification to their cash or bond allocations. The portfolio is designed to generate steady, low volatility returns and be immune to rising interest rates.

Profile

Market risk	Market neutral
Investments	Hedge funds with a conservative investment approach
Focus	Exploit relative value opportunities globally
Target return	USD SOFR + 4% per annum
Volatility	< 3% per annum
Benchmarks	SOFR + 4% and FTSE World Government Bond Index
Liquidity	Quarterly

Portfolio construction

	Relative Value funds	Macro Trading funds
Normal market environment	Stable returns	No losses
Strong market correction	Limited losses	Positive returns

Performance

Strategy breakdown

The returns of Crossbow Alpha are based on a client portfolio since August 1, 2015. Prior, it is calculated based on the initial fund positions. The performance for the entire period is in USD and net of all fees.

Crossbow Trading

The Trading Portfolio is suitable for investors seeking diversification to their traditional portfolios. The portfolio is designed to generate a positive, asymmetric return profile and benefit from changes in the macro-economic environment by trading across asset classes.

Profile

Market risk	Uncorrelated to traditional markets
Investments	Hedge funds with a macro trading investment approach
Focus	Exploit broad macro-economic changes
Target return	USD SOFR + 4 - 6% per annum
Volatility	< 5% per annum
Benchmarks	SOFR + 4% and MSCI World TR Index
Liquidity	Monthly

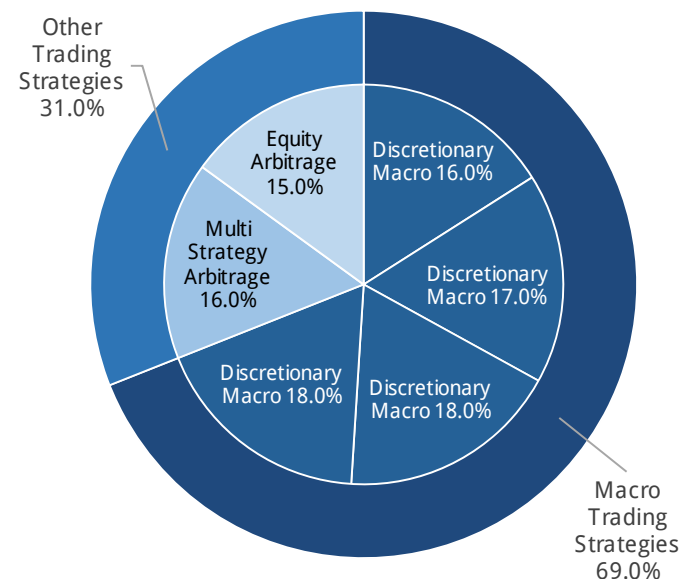

Portfolio construction

	Macro Trading funds	Other Trading funds
Normal market environment	Stable returns	Stable returns
Strong market correction	Positive returns	Limited losses

Performance

Strategy breakdown

The returns of Crossbow Trading are based on a client portfolio since Sep. 1, 2015. Prior, it is calculated based on the initial fund positions. The performance for the entire period is in USD and net of all fees.

CB Global Commodity Portfolio

The CB Global Commodity Portfolio seeks to generate attractive, uncorrelated returns by capitalizing on the multi-dimensional opportunity set such as supply & demand imbalances, weather and seasonality effects, substitution effects etc. that is uniquely available in commodity markets.

Profile

Market risk	Uncorrelated with equities and bonds
Investments	Hedge Funds specialized in commodity strategies
Focus	Take advantage of rising and falling commodity prices
Target return	USD SOFR + 8-10% per annum
Volatility	< 10% per annum
Benchmarks	SG Commodity Trading Index, BBG Commodity Index TR
Liquidity	Monthly

Portfolio construction
